Dear [redacted]

STAT

Here, as promised, is the transcript of our conversation some weeks ago on Richard Helms and Congress. In going over the transcript I was pleased by the wealth of information it contains which will be invaluable for our project. A good portion of this is material which will not show up in the written records that have been retained by the Agency. As a consequence, your willingness to share your recollections with us is all the more appreciated.

Please feel free to make changes that you feel would clarify the meaning of the transcript or amplify a particular point you were making.

I am enclosing an envelope to make it easy for you to return the transcript once you have gone over it.

I greatly enjoyed our chat together last month. Again, please be assured of our gratitude for all your help.

With best wishes,

/s/
